## China Plus

# The Full Circle: Red envelopes, hands-on classes, one-person companies

*Note: This podcast transcript is generated by third-party AI.*

Discussion keeps the world turning.
讨论使世界运转。

This is Round Table.
这是圆桌会议。

You're listening to Round Table.
您正在收听圆桌会议。

I'm Neil Holing, joined by Steve and Yixuan.
我是尼尔·霍林，史蒂夫和易轩也在。

Coming up soon...
接下来很快就会揭晓...

There's a pattern hiding in this week's stories.
本周的故事中隐藏着一个模式。

You can't see it just yet because we haven't laid all the pieces on the table.
你暂时还看不到，因为我们还没有把所有的棋子都放在桌面上。

But once we do, something unexpected starts to emerge.
但一旦我们这样做，一些意想不到的东西开始浮现出来。

Yes, it's time for our full circle segment again.
是的，又到我们再次回顾整体阶段的时候了。

Welcome to the full circle.
欢迎来到完整的一圈。

Three stories, different topics, different worlds.
三个故事，不同主题，不同世界。

On the surface, nothing obvious connects them.
表面上，它们之间没有明显的联系。

But look closer, we can see a thread.
但是仔细看看，我们能看到一根线。

To start with, what are the three stories that we picked this week?
首先，我们这周选择了哪三个故事?

Yeah, I've got it this week,
是的，我本周有收获，

and the first one that I chose is from Thursday about the red envelope dilemma.
而我选择的第一篇是关于红包困境的周四文章。

So Hong Bao also can be called Red Envelope or Lucky Money that given out to younger generations by older generations during,
所以红包也可以称为红包或压岁钱，这是长辈在节日季节，比如春节期间，

for example, holiday season like the Spring Festival period.
给年轻一代的，

Yeah, so we talked about how the pressure is different now, where in the past,
是的，所以我们谈论了现在的压力与过去不同，

it wasn't so much about the amount, it was about the gesture of giving the envelope,
过去更多不是关于金额，而是关于送红包的举动，

but now, you know, with incomes rising and more money in the envelopes,
但现在，你知道，随着收入的增加和红包里的钱更多，

expectations are rising, so there's some anxiety and pressure involved.

期望也在上升，所以有一些焦虑和压力。

Yeah, and especially in these days, different families would have different numbers of kids,
是的，尤其是在这些日子里，不同的家庭会有不同数量的孩子，

and you want to know if you want to give each kids the same amount as those,
你想要知道你是否想给每个孩子相同数额，就像你收到的那些一样，

as you received or the total amount, and there are a lot of factors to think about.
或者是总额，这需要考虑很多因素。

Everybody's wondering that same question.
每个人都想知道同一个问题。

So that was the story from Thursday.
这就是周四的故事。

That's story number one.
这是第一个故事。

The next one that I chose was from Wednesday.
我选择的下一个是来自周三的。

This is about the university labor class boom.
这关于大学的劳动课程热潮。

There's a course that teaches basic cooking skills.
有一门课程教授基本的烹饪技能。

Nothing too fancy You can learn how to make fried rice or some chicken or some lamb things like that some different dishes and they only have room for about 36 students,
没有什么太花哨的 你可以学习如何做炒饭或者一些鸡肉或者一些羊肉之类的 一些不同的菜肴 他们只能容纳大约36名学生，

but the applicants exceeded 300 See we just talked about how the night classes are booming right well these similar style classes are booming in universities I would want to learn how to fix my car.

但是申请人数超过了300 看见了吗，我们刚才谈到夜校很火爆 对，这些类似风格的课程在大学里也很火爆 我想知道如何修理我的车。

I have never touched the engine of my car And if you can do that in a university classroom, why not?
我从未触摸过我的汽车引擎 如果你能在大学教室里做到那一点，为什么不呢?

I mean cooking is certainly something that's totally underrated by modern-day education I'm telling you it's a whole system that the earlier you learn the better mechanics to read it,
我的意思是，烹饪在现代教育中绝对是被低估了的东西，我告诉你，这是一个越早学习越好的整个系统，

but you never got it It's hot in school, it's so weird.
但你从未真正掌握它。学校里很热，太奇怪了。

I'm gonna come back to that point a little bit later.
我稍后会回到那个点上。

That's my second one.
这是我的第二个。

Okay, so story number three, this is also from Thursday,
好的，那么第三个故事，这也是来自星期四，

and this is about AI-powered one-person companies.
这是关于人工智能驱动的单打独斗的公司。

AI has rewritten entrepreneurship rules.
人工智能已经重新定义了创业规则。

Once dependent on complex teams and substantial capital and resource accumulation,
曾经依赖于复杂的团队、大量的资本和资源积累，

entrepreneurship now has a new paradigm.
现在创业有了新的范式。

AI-powered one-person companies, they're called OPCs.

人工智能驱动的单人公司，它们被称为OPCs。

Yeah, so the idea before, you know,
是的，所以之前的想法，你知道的，

especially about entrepreneurship was that you needed a lot of money up front.
特别是关于创业，是说你一开始需要很多钱。

You needed a large team to get started, but this is just totally the opposite situation now.
开始时你需要一个大型团队，但现在的情况正好相反。

AI is making one person companies, not just possible.
人工智能正在让一人公司成为可能。

They're making, it's making it popular.
它们正在使它变得流行。

I don't like this idea.
我不喜欢这个主意。

I don't think I'm that good at artificial intelligence and I will work too hard.
我觉得我不太擅长人工智能，我会很努力工作的。

Those are two of the points that we talked about.
这是我们讨论的两个要点。

Number one, you guys.
第一，你们这些人。

to know how to use these AI tools.
要知道如何使用这些AI工具。

And number two, one of the downsides of it is, of course,
第二，它的一个缺点是，当然，

it's a trade-off that you really have to sacrifice a lot of your own time and be fully committed to.
这是一个需要你牺牲大量自己的时间并全身心投入的权衡。

Yeah, so red envelope dilemma somehow,
是啊，所以这个发红包的难题 somehow，

and learning the kind of classes or the kind of courses that would allow you,
还有学习那些能让你、或者几乎会迫使你在大学课堂和人工智能驱动的一家公司里获得实际操作经验的课程?

would almost force you to have hands-on experiences in university classrooms and AI-powered one person company?
会几乎迫使你在大学课堂和人工智能驱动的一家公司里获得实际操作经验的课程?

What would be the full circle this time?
这次完整的循环会是什么?

All right, let me draw the thread for you.
好的，让我为你画出这根线索。

All three stories expose a widening gap between what a tradition promised and what the modern version demands.
这三部故事都揭示了传统承诺与现代版本要求之间不断扩大的差距。

And in each of these cases, someone is building a bridge to close the distance.
在这每一个案例中，都有人在搭建一座桥梁来缩短距离。

We're talking about gaps and bridges.
我们谈论的是差距和桥梁。

We'll start with the red envelope story.
我们将从红包故事开始。

The Hongbao promised luck and blessing.
红包承诺带来好运和祝福。

And it was a simple exchange of love between different generations.
这是不同代人之间简单爱的交换。

But the gap between that promise and today's reality has grown wide now adults some people they'll budget for the holiday for months just because of the red envelopes and anxiety spikes before the holiday and again it's that question how

much did you get oh well how much did you get that has become the unspoken question that no one asks but everyone is calculating all the time so what was meant to carry sentiment now carries social debt so to never that gap communities are publishing suggested amount charts and local governments are issuing caps and it's not done to kill the tradition but to bridge it to bring it back to its original meaning the bridge it's still under construction in the red envelope case but the direction is clear less calculation and more connection now on to the labor classes a university degree promised prestige and theory and a ticket to a better future,

但现在，那个承诺和今天的现实之间的差距已经变得很大，现在有些人会为节日预算几个月，仅仅因为红包和节前焦虑的增加，再次是那个问题：你得到了多少啊，哦，你得到了多少啊，这已经成为一个无人问津但每个人都在计算的问题，所以原本承载情感的东西现在承载着社会债务，所以永远不要跨过那个差距，社区正在发布建议金额图表，地方政府正在发布上限，这并不是为了扼杀传统，而是为了将其连接起来，让它回归到其原始含义，这个桥梁在红包案例中仍在建设中，但方向是明确的：减少计算，增加联系。

right?

对吧?

That's what we all thought when we entered into our own schools.

当我们进入自己的学校时，我们都这么想。

But the gap between the promise and the reality became impossible to ignore.

但承诺与现实之间的差距变得无法忽视。

You have these really, really intelligent graduates who can solve complex equations,

你会有这些非常、非常聪明的毕业生，他们能解决复杂的方程，

but they can't boil an egg.

但他们却不会煮鸡蛋。

So the expectation there was that life skills would come from life itself.

所以，那里的预期是生活技能会从生活中本身获得。

You said you've never touched the inside of a car's engine,

你说你从未触摸过汽车引擎的内部，

but you thought it would come to in your life somehow.
但你认为它会在你的一生中以某种方式出现。

But the reality is, is that it doesn't.
但事实是，并非如此。

Helping in the kitchen.
厨房里帮忙。

Maybe helping a parent fix a leaky faucet.
或许是在帮父母修理漏水的水龙头。

Those moments, those learning opportunities at home now between parents and kids,
这些时刻，现在在父母和孩子之间在家里的学习机会，

they are quite scarce.
相当稀缺。

So to narrow that gap, students said, hey.
所以学生们说，嘿，为了缩小这个差距。

University, why don't you start teaching me something different?
大学，为什么你不教我一些不同的东西呢?

And universities responded, turning classrooms into bakeries and auto shops.
于是，大学做出了回应，将教室变成了面包房和汽车修理店。

So the bridge is being built course by course and students are lining up.
因此，桥梁是一课一课地搭建起来的，学生们排着队。

to cross it.
去穿越它。

Now I get it.
现在我明白了。

For the one person company thing in previous days, it's almost impossible.
对于以前的那家一个人的公司，几乎是不可行的。

I mean, it's a great idea.
我的意思是，这是一个好主意。

If you think about it, you got freedom, you can control the company,
如果你仔细想想，你拥有了自由，你可以控制公司，

but you have to control the company and control yourself.
但你也必须控制公司和控制自己。

And you have to, well, still have all the possible capabilities,
你必须仍然拥有所有可能的能力，

different types of abilities to be able to really form a company,
不同类型的技能才能真正创办一家公司，

which means a one person company can Hardly be the reality but AI closed that gap totally now the promise is completely different one person one laptop one company is totally possible So to narrow the gap between what the remaining gap is between independence and loneliness there
这意味着单人公司几乎不可能是现实，但现在AI完全填补了这个差距，承诺完全不同：一个人、一台笔记本电脑、一家公司是完全可能的。因此，为了缩小独立与孤独之间的差距，

because running your own company as a one-person company There's loneliness as well,
因为作为单人公司的老板，也会有孤独感，

but now founder communities are forming mentorship networks.
但现在创始人社区正在形成导师网络。

Those are growing policies are catching up as well.
那些增长政策也在迎头赶上。

So the bridge bridge here for the one person companies, it's not about lowering expectations.
所以这里的桥桥，针对的是一人公司，这并不是要降低期望。

It's about proving that the old trade off wasn't necessarily the only path,
这是在证明旧的权衡不一定只有一条路，

meaning if you're going to work on your own,
也就是说，如果你打算自己工作，

you're going to have to take that loneliness whether you like it or not.
你必须接受那种孤独，不管你是否喜欢。

Now we know that going solo doesn't mean you have to go it alone.
现在我们知道，独自一人并不意味着你必须独自一人去。

So there you go.
就是这样。

Those are the three stories,
这三个故事，

three gaps and three bridges all being fixed one course or one step at a time.
三个缺口和三个桥梁都在一步步修复，一次一个步骤。

It's not only about these three stories, isn't it?
这不仅仅关乎这三个故事，不是吗?

It's about almost everything.
这是关于几乎所有的事情。

Being able to see a problem, being able to identify the gap,
能够看到问题，能够识别差距，

and being able to create that bridge that solves the problem,
并且能够创建解决这个问题的桥梁，

or make sure that the gap is somehow narrowed.
或者确保差距以某种方式缩小。

Like previously, we've aired our new podcast series, Sage and Youth,
就像之前一样，我们播出了我们的新播客系列，智慧与青春，

Understanding or Debating, Drunk's Tow, and it got quite popular among audience.
理解与辩论，醉汉的拖车，它在观众中相当受欢迎。

They said they like the idea.
他们说他们喜欢这个想法。

They like the show.
他们喜欢这个节目。

And I think partly the reason here is that we know that traditional Chinese philosophy is something with a lot of wisdom.
我认为部分原因在于，我们知道中国传统哲学蕴含着许多智慧。

It's something that is worth learning and it might have a huge benefit.
这是一件值得学习的事情，它可能会带来巨大的好处。

It might inspire you to solve the problems in your own life.
这可能会激发你解决自己生活中的问题。

Yet the gap there was that it was written in traditional Chinese.
然而，那里存在的差距是它是用传统中文写的。

Chinese language,
中文语言，

it was taught in a way that is not that easily understood or interpreted by everybody.
它的教学方式并不容易被每个人轻易理解或解释。

So in order to narrow that gap, we invited young media professionals to talk about the idea,
所以为了缩小这个差距，我们邀请了年轻的媒体专业人士来讨论这个想法，

to debate over whether or not they like it,
讨论他们是否喜欢这个想法，

whether or not these philosophies still apply for today's world.
这些哲学是否仍然适用于当今世界。

And by doing that, we're able to introduce that philosophy into today's audience.
通过这样做，我们能够将这种哲学引入今天的观众中。

We always assume that if we want to gain something, we have to give something up.
我们总是认为，如果我们想要得到一些东西，我们必须放弃一些东西。

If you want to learn about Zhuangzi, you have to give up fun.
如果你想了解庄子，你必须放弃乐趣。

But that's not true.
但这不是真的。

That's not true.
这不是真的。

But that's not true.
但这不是真的。

If you want to run your own company, you have to give up working with other people.
如果你想自己创业，你必须放弃与他人合作的工作。

You have to give up your own time.
你必须放弃你自己的时间。

You have to give up your own energy.
你必须放弃你自己的精力。

So I was thinking about like sacrifices.
所以我一直在想关于牺牲的事情。

Have you ever sacrificed something?
你有没有为了得到其他东西而牺牲过什么?

in your life to gain something else?
在你的生命中?

Like you gave up one thing so that you could gain another thing?
就像你放弃了一样东西，为了得到另一样东西吗?

We were just talking about solo entrepreneurialship.

我们刚才正在谈论单打独斗的创业。

And back in the days when I was in university,
而且在我上大学的时候，

which is like over 10 years ago, that was not yet a thing like only mentioned.
那大概10年前，那时还没有像现在这样只是被提及而已。

And that was something that really triggered me back in the memory lane
这让我真正触动了回忆

because me and my ex-boyfriend,
因为我和我前男友，

the boyfriend at that time, we were trying to,
那时的男朋友，我们正在尝试，

well, we were actually enrolled in the school's program of youth entrepreneurship,
嗯，我们实际上报名参加了学校的青年创业项目，

meaning that be his first and only employee on that program we were working on.
这意味着他是我们正在工作的那个项目上的第一个也是唯一的员工。

Imagine this, having a company or some sort of a hub or a center for yourself at the age of 20.
想象一下，20岁的时候，自己拥有一家公司或者某种形式的中心。

That was our dream, or more precisely, his dream, where I'm just a participant of that program.
那曾是我们的梦想，或者更确切地说，是他的梦想，而我只是那个项目的一个参与者。

And in the meantime,
与此同时，

I got an invitation to go study in the University of Copenhagen for about half a year,
我收到了一份邀请，去哥本哈根大学学习大约半年，

because I was achieving certain grade that I was chosen to be part of that exchanging program.
因为我达到了一定的成绩，被选为那个交换项目的一员。

But that kind of overlaps with a lot of our plan in building that entrepreneurship plan that we had back then.
但那种情况与我们的很多计划重叠，我们当时制定的那份创业计划。

So we were having, I remember very vividly from over a decade ago of that big conversation we had,
所以，我记得非常清楚，那是十多年前我们有一次大的谈话，

I had with my ex.
是与我的前妻。

I think this really means a lot to me, and I'd like to go.
我认为这对我来说意义重大，我想去。

It's only six months, if not shorter than that.
只有六个月，如果不是比那更短的话。

But he was like, but do you consider it?
但他好像是在说，你考虑过吗?

don't you consider it selfish that you take on this your own chance?
难道你不认为你把这个机会揽在自己身上是自私的吗?

Do you have no plan?
你没有计划吗?

I'm so happy he's called the ex boyfriend.
我很高兴他给前男友打了电话。

So that was the thing.
所以这就是那件事。

I thought I was giving up my periodical chase of academic advancements, aka my dream,

我以为我放弃了追求学术进步的定期追逐，也就是我的梦想，

in sacrificing all that in exchange for the possible achievement of our dream.
牺牲所有这一切来换取我们梦想的可能的实现。

But was it worth it?
但这值得吗?

Actually, no, because it didn't work out.
实际上，不值得，因为那没有成功。

work out for that program isn't work out for our relationship, but do I regret it?
为那个项目付出努力并不意味着对我们的关系有益，但我后悔了吗?

The answer remains to be no,
答案仍然是还没有，

because it was in a way to teach me that there's no mistake for chasing personal dreams.
因为这种方式是在教我，追逐个人梦想没有错误。

And for all the girls out there,
至于所有那些女孩们，

I know there are a lot of girls and female researchers that's listening to round table these days.
我知道现在有很多女孩和女性研究员正在收听圆桌讨论。

And we shouldn't feel guilty or shy away from opportunities that's given to you,
我们不应该感到内疚，也不应该回避那些给予你的机会，

that's that you earned.
因为这些机会是你应得的。

So it's okay to be in an intimate relationship, whatever kind that may be.
所以，无论是什么样的亲密关系，都是可以的。

And in the meantime,
同时，

stay shining and remain a highly accomplished individual regardless of which face of life you are in right now.
保持闪耀，无论你现在处于生活的哪一面，都保持一个高度成就的自我。

So yeah, that's something that I really kind of feel personally touched.
所以，是的，这让我感到非常个人层面的触动。

This is not a story that I share on a daily basis.
这不是我每天都会分享的故事。

I assure you.
我向你保证。

So yeah.
所以是的。

Thanks for sharing.
感谢分享。

Really, it's about what you sacrifice, what you get in exchange.
真的，那关乎你所牺牲的，你所得到的交换。

And in my case, that's a lifelong lesson.
在我的情况下，那是一生的教训。

Well, for me, it's cool.
对我来说，这很酷。

quite much more shallow in the case
在这一点上，要浅得多。

because I have had experience learning in learning interpretation in Brussels and when I was there I spent a lot of my out of school time practicing and learning
因为我在布鲁塞尔学习解释学时有过经验，当时我在那里花了很多课外时间去练习和学习

because I feel
因为我觉得

like it's a very intensive training period and learning would be much more quote unquote useful and meaningful than going around in Europe in Brussels.
这是一段非常紧张的训练期，学习要比在欧洲布鲁塞尔四处闲逛更有用和有意义。

And yeah, you know the mentality of a student.
是的，你知道学生的心态。

Yeah, but at the end of that five months,
是的，但在那五个月结束时，

when I finally got a chance to walk around a little bit in different cities in Belgium,
当我终于有机会在比利时不同城市稍微四处走走时，

I totally felt like I was even learning more and learning about local people,
我完全感觉我学到了更多，而且是在了解当地人，

local culture, learning about local architecture,
当地文化，了解当地建筑，

how they understand the world was their perspectives.
他们是如何理解世界的，那就是他们的观点。

And I was a little bit regretting.
我有点后悔。

not making good use of my time at that time.
当时没有好好利用我的时间。

But I think it's also about perspectives.
但我认为这也关乎视角。

My story is so similar because after high school, I think I've mentioned this on the show before.
我的故事如此相似，因为高中毕业后，我想我在节目中提过这件事。

After high school, my best friend, we actually ended up moving to Korea together years later.

高中毕业后，我的最好朋友，我们实际上在多年后一起搬到了韩国。

But just after high school, he said, hey, Steve, let's go backpack in Europe for six months.
但就在高中毕业后，他说，嘿，史蒂夫，我们去欧洲背包旅行六个月吧。

And I said, are you crazy?
我说，你疯了吗?

And he said, why not?
他回答说，为什么不呢?

Let's just take a backpack full of clothes and stuff and just go.
我们就带上一个装满衣服和其他东西的背包，就这样走吧。

I said, how are you going to get around?
我说，你打算怎么四处走动?

He said, I think they have trains and stuff.
他说，我觉得他们有火车之类的交通工具。

You just go from country to country.
你只需从一个国家走到另一个国家。

I said, with what money?
我说，用什么钱?

He said, mom, just put some money together.
他说，妈妈，你就凑点钱吧。

I said, no, I can't do that.
我说，不行，我不能那么做。

I got to go to university.
我必须去上大学。

He said, just delay it.
他说，就推迟一下吧。

I said, delay university.
我说，推迟上大学。

Nobody delays university.
没有人会推迟上大学。

So he went to Europe for six months.
所以他去了欧洲六个月。

Backpacked country to country to country didn't have much money didn't care saw Pavarotti for free He was in the back row.
背包穿越了一个又一个国家，没有多少钱，不在乎这些，免费看了帕瓦罗蒂的演出。他坐在后排。

He snuck in I think he said he snuck into the theater
我觉得他偷偷溜进去了，我想他说他偷偷溜进了剧院

Because he knew Pavarotti was there and it sold out obviously and very expensive not suggested or encouraged on round table by the way
因为他知道帕瓦罗蒂在那里，显然已经售罄，而且非常贵，顺便说一下，在圆桌讨论中并没有建议或鼓励这样做

if you're backpacking in Europe go ahead Snuck in saw Pavarotti from the you know from the very back row still and Yeah,
如果你在欧洲背包旅行，那就去吧，偷偷溜进去，从你知不知道的最后一排看到了帕瓦罗蒂，是的，

no kidding and what did I do?
别开玩笑了，我做了什么?

I guess I'll fill out my application now.
我想我现在应该填我的申请表了。

You know what I mean?
你知道我的意思吗?

I don't regret a lot of things in life, but I certainly regret that.
我生活中不后悔很多事，但我确实后悔这件事。

Yeah.
是啊。

But I don't know, would you still make the same choices?
但我不知道，你还会做出同样的选择吗?

No.
不会。

No, no, not for today's you.
不，不，今天对你来说不行。

Oh.
哦。

For 20 year old you.
对于20岁的你来说。

Today's me would tell 20 year old me.
今天的我会告诉20年前的我。

Go sneak into the Polymer show and worry about your application later.
偷偷溜进聚合物展，之后再担心你的申请吧。

But that's just me.
但这只是我。

You're right.
你说得对。

We can't give that out as advice to everyone, but I do regret not doing that.
我们不能把那当作给每个人的建议，但我确实后悔没有那么做。

Yeah.
是的。

So next time when you make a big decision,
所以下次当你做出重大决定时，

maybe you can jump out of your shoe today and try to think of it.
也许你今天可以跳出你的鞋子，试着去想一下。

10 years 20 years ahead and think whether or not you make the choice you will regret the choice that you make yeah I mean we're all on a path of some sort right so what do we really need to regret that's another question perhaps for another day all right then for today's full circle um any final thoughts I do now when I was going with the um full circle stories.
10年后，20年后，想想你是否会后悔你所做的选择。我的意思是，我们都在某种路径上，对吧？那么，我们真正需要后悔什么呢？也许这是另一个问题，或许是另一天的话题。好吧，那么，对于今天的圆满结束，我有一些最后的想法。当我讲述这些圆满的故事时。

I was looking for bridges and gaps.
我在寻找桥梁和缝隙。

But when I was sitting looking at the stories and thinking about,
但是当我坐着看故事，思考着，

you know, what do I feel about these?
你知道，我对这些有什么感觉?

My brain actually went in a different direction.
我的大脑实际上朝了另一个方向思考。

Why do we always assume that more is better?
我们为什么总是认为越多越好?

More money, more employees, more credentials.
更多的钱，更多的员工，更多的资历。

It's not even a thing that we think about anymore.
这甚至不再是我们需要思考的事情了。

It's not even a question that we think to ask.
这甚至不是一个我们会想到去问的问题。

It's just what we do.
这仅仅是我们所做的。

It's the air that we breathe, and it's not even cultural.
这是我们呼吸的空气，甚至都不带有文化色彩。

It's a global thing.
这是一个全球性的问题。

It's true in China.
在中国也是如此。

It's true in Canada.
在加拿大这是真的。

It's true everywhere.
到处都是真的。

We were raised on it.
我们就是这样长大的。

More friends means more popular, which means better.
朋友越多越受欢迎，这也就意味着更好。

More money means more success, which means better.
钱越多越成功，这也意味着更好。

More knowledge means higher status, which means mm-hmm.
知识越多地位越高，这也意味着嗯嗯。

Better.
更好。

You see there, status is the thread running through all of those things.
你看，状态是贯穿所有这些事情的一条线索。

It's the invisible scoreboard that we're constantly trying to chase.
它是我们不断追逐的无形记分板。

But if that's true, if status is really what we're chasing, then here's a problem.
但如果这是真的，如果我们追求的是地位，那么这里有一个问题。

We're never actually going to get there.
我们永远都不会真正达到那里。

Because status isn't a destination, it's a comparison.
因为地位不是一个目的地，而是一种比较。

And comparisons don't end.
比较永远不会结束。

There's always someone with a thicker envelope, a fancier degree, or a shinier one-person company.
总有人的信封更厚，学位更炫，或者个人公司更闪亮。

So if we're always chasing, always climbing, always measuring, when do we actually stop?
所以如果我们总是追逐，总是攀登，总是衡量，我们何时才能真正停下来?

When do we actually enjoy what's in front of us?
我们到底什么时候才能真正享受眼前的事物?

The answer, I think, is never.
我认为答案永远都不会。

But this is where it gets tricky, because ambition is a virtue.
但是这里就变得复杂了，因为野心是一种美德。

Wanting a better life for yourself or for your kids better than the one that you had,
想要为自己或为你的孩子过上比你所拥有的更好的生活，

that's not greed, that's love.
这并非贪婪，这是爱。

That's human nature.
这是人性。

So how can we say it's wrong to want more, to achieve more, and to reach for something higher?
那么我们怎么能说渴望更多、追求更多、追求更高的目标是错误的呢?

I don't know.
我不知道。

I really don't.
我真的不知道。

But if I ever figure it out, I'll write a book.
但如果我有一天能搞清楚，我会写一本书。

And you can buy it.
你可以买它。

So I can have more money, more friends, and a better status.
这样我就能有更多的钱，更多的朋友，和更好的地位。

That is a lovely, lovely final thought.
这是一个非常美好、非常美好的结尾思考。

And I guess that's it.
我想这就是全部了。

There's always that gap.
总会有这样一个差距。

There's always that wondering of whether or not we can do a better job.
我们是否能够做得更好，这种疑问总是存在。

And there's always the thinking of whether or not we would regret our, well, previous decisions.
而且，我们总是在想，我们是否会后悔我们之前的决定。

But after today's full circle, I'm actually curious to know, do you think if...
但是经过今天的完整循环，我实际上很好奇，你认为如果……

Like maybe, for example, for the red envelope case,
就像可能，比如说，对于红包袋，

it was the community standing out as a third party providing somehow a kind of solution or a bridge for the AI one person company.

是社区作为一个第三方脱颖而出，以某种方式提供了一种解决方案或桥梁，为个人AI公司。

It's somehow technology development that.
这是某种技术发展。

solved that used to be unsolvable problem.
解决了曾经看似无法解决的问题。

And for us, we, for Yushan and our, well, Steve and I,
对我们来说，对我们，对玉山和我们的，嗯，史蒂夫和我，

we thought about the previous situation and we realized that it may be a change of perspective would make our previous decision not that regrettable or maybe at that time,
我们回顾了之前的情况，我们意识到可能是一个视角的改变会使我们之前的决定不那么遗憾，或者也许在当时，

a change of perspective would push us to do a different, to make a different decision.
一个视角的改变会推动我们做出不同的，做出不同的决定。

So do you think somehow some problems They're not meant to be solved by trade-offs or by sacrifices.
所以你认为某些问题可能并不是通过权衡或牺牲来解决的。

They should be solved by creative thinking, by a surprising factor, or by someone's help,
它们应该通过创造性思维、一个出人意料的因素，或者某人的帮助来解决，

by like 20-year-older Steve telling 20-year-younger Steve to think about it another way.
比如20岁的史蒂夫告诉20岁的年轻人史蒂夫用另一种方式来思考。

I have put a lot of thought into this type of thing.
我对此类事情想了很多。

as I've gotten older because, you know, you think, we ask that question, right?
随着年龄的增长，你知道，你会思考，我们会问那个问题，对吧?

Like, what would you tell your younger self?
比如，你会告诉年轻时的自己什么？

Yeah.
是啊。

But even, I sometimes think, even if I told my younger self what I know now,
但是即使如此，我有时甚至想，即使我告诉我年轻时的自己我现在所知道的一切，

I don't think my younger self would listen to me.
我也不认为年轻时的自己会听我的。

Precisely.
正是如此。

Right?
对吧？

Because it's a matter of perspective.
因为这取决于观点。

And people need to go through things on their own.
人们需要自己经历一些事情。

and experience things on their own for them to fully grasp the concept.
并且需要自己体验一些事情，才能真正理解这个概念。

I could tell a young person right now, you know,
我现在就可以告诉一个年轻人，你知道，

enjoy your high school time because it's actually pretty good.
享受你的高中时光，因为实际上它真的很不错。

But not to a high school student.
但是并不是对于高中生来说。

It's very difficult because the perspective is different.
非常困难，因为视角不同。

They're super focused on the gaokao or whatever test you need to take.
他们非常专注于高考或者你需要参加的任何考试。

And it's really stressful.
这真的很压力大。

And then you've got, you know, the society that exists within high school.
然后你还有，你知道的，存在于高中内部的社会。

And that can be tough for young students.
这对年轻学生来说可能很艰难。

I could say when you're young, don't worry too much about how your career path is going to go.
我可以说，当你年轻的时候，不要过于担心你的职业道路会如何发展。

Just keep working hard and you'll figure it out someday.
只要继续努力工作，你总有一天会找到答案的。

But I only can say that because I have the ability of hindsight.
但我只能这么说，因为我有事后诸葛亮的能力。

But without hindsight,
但是没有先见之明，

it's impossible to grasp that advice because foresight is not something readily available to people.
就无法理解这些建议，因为预见并不是人们轻易就能得到的东西。

Just like 75 year olds, no more than we do.
就像75岁的人一样，我们也不比他们更有先见之明。

By nature.
天生如此。

But we probably won't listen to them a lot of the time when they try to tell us stuff.
但当我们试图告诉我们东西的时候，我们可能大多数时间都不会去听他们。

Yeah, and time is always changing for young people.
是的，年轻人总是随着时间的推移而变化。

I think at every...
我认为在每个...

turning point where every decision you are making or about to make,
转折点，无论你正在做出还是即将做出的每个决定，

as long as you stay true to yourself instead of other people's opinion or expectations on you,
只要你忠于自己，而不是别人的观点或对你的期望，

there's a lesser chance of regretting.
后悔的机会就会小很多。

That's true.
那是对的。

And we can always say to the younger version of ourselves that,
我们总是可以对年轻时的自己说，

oh, your problem is just a minor issue.
哦，你的问题只是一个小问题。

It will not bother you in the future.
未来它不会再打扰你了。

You might not even remember it when you're older.
当你年纪更大时，可能甚至都不记得了。

But to each and every self of us, each and every version, that feeling was so real.
但对于我们每一个自我，每一个版本，那种感觉都是如此真实。

Your first heartbreak, right?
你的第一次心碎，对吧?

Old you, not old you.
老的你，不是现在的你。

I mean, old anyone looks back and says, ah, that was nothing.
我的意思是，任何人回望过去都会说，啊，那算不了什么。

But at that moment, at that time, it feels like the world is coming to an end.
但就在那一刻，就在那时，感觉世界都要末日了。

But a good thing is when we're talking about the kind of problems in the society,
但好事是当我们谈论社会中的问题，

the kind of problems for a career, there are often different ways to solve it.
职业中的问题，通常有不同解决方法。

So try to be creative in those situations.
所以在那种情况下尽量发挥创意。

And that brings us to the end of today's roundtable.
这就带我们结束了今天的圆桌讨论。

I'm Neal Holen with Steve and...
我是尼尔·霍伦，和史蒂夫一起……

Thank you so much for listening.
非常感谢您的聆听。

We'll see you next time.
下次再见。
